Summary

Full Stack Developer and Full-Stack Software Engineer skilled in JavaScript, TypeScript, **React.js**, Next.js, and Node.js. Experienced in REST API development, software system architecture, database design, cloud deployment, and the Software Development Life Cycle (SDLC), including CI/CD (Continuous Integration and Continuous Deployment) pipelines. Built and shipped an AI-powered Chrome extension and a MERN-stack SOP generator. Seeking a remote **Full Stack Developer** role.

Education

DAV PG College Dehradun, Uttarakhand
Bachelor of Science (B.Sc.) in Information Technology, CGPA: 7.1/10 *Sep 2023 - Aug 2026*

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Web Technologies

Experience

Offbeat Pixels Jul 2026 - Oct 2026
Full Stack Developer

- Built and maintained production **Full Stack** features with **React.js**, Next.js, TypeScript, **Node.js**, **MongoDB**, and Tailwind CSS across the Software Development Life Cycle (SDLC), improving UI responsiveness by 25%.
- Automated deployments with **CI/CD** pipelines (Continuous Integration and Continuous Deployment) in GitHub Actions and debugged **REST API** issues in Express.js and Node.js, cutting bug resolution time by 15%.
- Contributed to code reviews and containerized applications with **Docker** and **Kubernetes** for consistent cloud infrastructure across development and production.

YugaYatra Retail (OPC) Private Limited May 2026 - Jul 2026
Software Engineer Intern

- Delivered **React.js** and Next.js frontend features 20% faster using AI-assisted development tools.
- Performed **API development**: built and integrated **REST API** endpoints with Node.js and Express.js, connecting frontend, backend, and database layers in a **Full Stack** system architecture.
- Performed database design: modeled **PostgreSQL** and Supabase schemas and managed **Docker** containers, improving data retrieval speed by 30%.

Projects

Explain This Diff (Chrome Extension) – *JavaScript, Manifest V3, Node.js, Express.js, Groq AI* Mar 2026

- Built a **Full Stack** Manifest V3 Chrome extension (JavaScript frontend with an Express.js and Node.js backend) that adds AI-generated summaries to GitHub pull requests, reducing code review time by 40%.
- Created an Express.js **REST API** proxy to secure Groq AI credentials; SHA-256 caching cut redundant API calls by 50%.

AI-Powered SOP Generator (MERN Stack) – *Zustand, Gemini AI, JWT* Jan 2026

- Architected a **Full Stack** MERN (MongoDB, Express.js, React.js, Node.js) application that turns process descriptions into Standard Operating Procedures (SOPs) with the Gemini AI API, using Zustand for React frontend state management.
- Implemented JSON Web Token (JWT) authentication, multi-tenant workspaces with a MongoDB database design, and PDF export; deployed on Vercel (frontend) and Render (backend) cloud platforms.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3
Frontend: React.js, React, Next.js, Tailwind CSS, Shadcn UI, React Router, Zustand, Responsive Design
Backend: Node.js, Express.js, REST API, API Development, System Architecture, JSON Web Token (JWT) Authentication
Databases: MongoDB, PostgreSQL, Supabase, Database Design, Schema Design
DevOps & Cloud: Continuous Integration and Continuous Deployment (CI/CD), Docker, Kubernetes, GitHub Actions, Git, Vercel, Render, Cloud Infrastructure, Cloud Deployment, Postman
Methodologies: Agile, Scrum, Software Development Life Cycle (SDLC), Code Review
AI Tools: Google Gemini, Groq AI, Large Language Model (LLM) Integration, AI-Assisted Development, Prompt Engineering
